EAZY

One of India's largest spice manufacturers switched to Eazy ERP.

It's been smooth sailing ever since.

next

EAZY

Before Eazy ERP, they were running on a disconnected, in-house system.

Procurement, production, and dispatch

next

EAZY

What Was Costing Them

- ✅ No forecasting, just reactive ordering
- ✅ No bag-wise or lot-wise traceability
- ✅ Dead stock piling up with no FIFO control
- ✅ Manual order booking with zero real-time tracking

next

EAZY

Why They Chose EazyERP?

They needed one thing:
a fully integrated system built for how spice manufacturing actually runs, not a generic ERP retrofitted to fit.

EAZY

What Changed?

Procurement

next

EAZY

What Changed?

Production

✅

BOM-driven material consumption

Machine-wise production tracking

Auto-generated batch numbers, zero manual errors

next

EAZY

What Changed?

Sales & Dispatch

- ✅ Centralized, approal-based order booking
- ✅ Real-time tracking across every branch
- ✅ Full MIS reporting - visible, finally

next

EAZY

The Transformation

After

- Constant firefighting.
- Inventory guesswork.
- Disconnected teams.

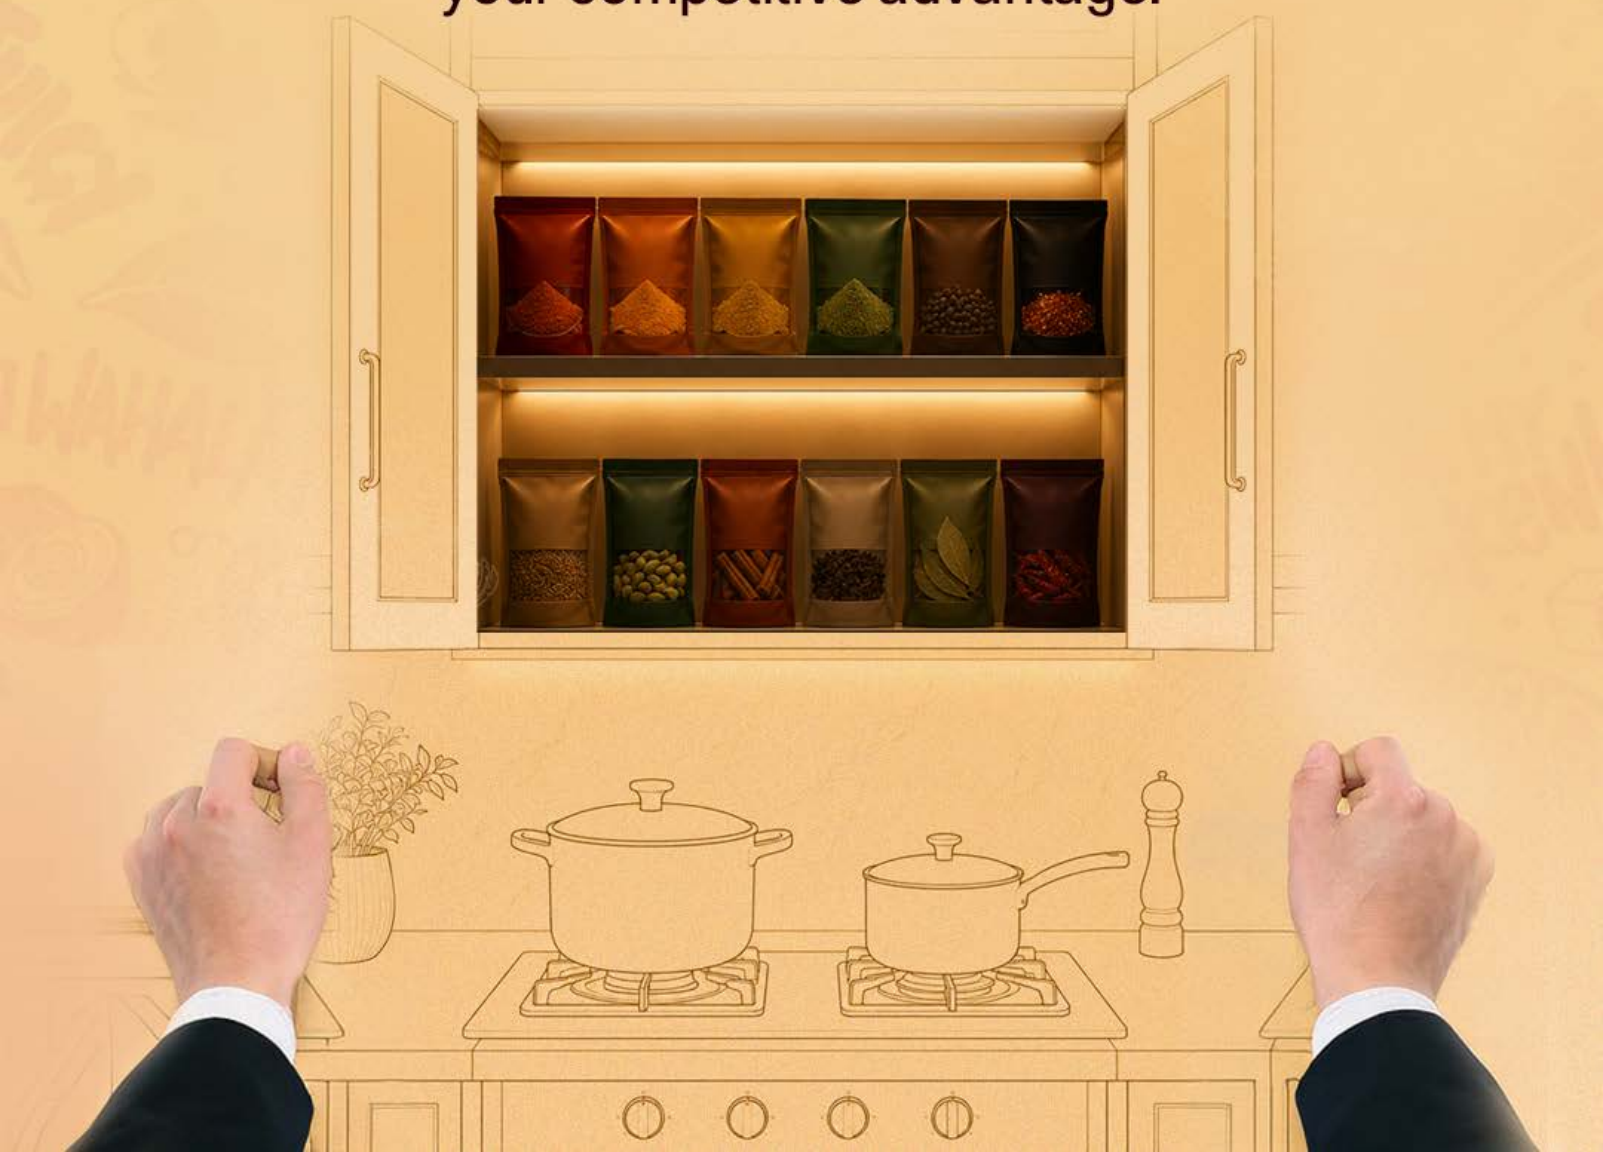

Before

- Real-time visibility across operations.
- Faster decisions backed by data.
- One system. Complete control.

EAZY

The Outcome

They didn't just implement an ERP.
They built a manufacturing operation that's faster, more predictable, and easier to scale.
That's what happens when your ERP becomes your competitive advantage.

EAZY

Is This Your Reality?

If you're a growing spice manufacturer, ask yourself:

- Are stock discrepancies slowing you down?
- Is production dependent on manual follow-ups?
- Do you still lack a single source of truth?

If you answered **yes** to even one,
it's time to rethink your ERP.
